

Systems Grading

5	<ul style="list-style-type: none"> • Evidence of significant water conservation and local supply sources. • Evidence of effective and efficient wastewater management. • Excellent communication networks. • Clear evidence of excellent pedestrian access, facilities. • Easy access to mass transit systems. • Established and fully functioning cycling facilities. • Clear evidence and usage of recycling programmes.
4	<ul style="list-style-type: none"> • Evidence of significant water conservation and local supply sources. • Evidence of effective and efficient wastewater management • Good communication networks. • Good pedestrian access, facilities. • Access to mass transit systems. • Good cycling facilities. • Recycling is a feature of project area.
3	<ul style="list-style-type: none"> • Evidence of water conservation and local supply sources. • Evidence of effective and efficient wastewater management • Adequate communication networks. • Adequate pedestrian access, facilities. • Access to mass transit systems. • Adequate cycling facilities. • Some evidence of recycling.
2	<ul style="list-style-type: none"> • Evidence of attempts at water conservation and local supply sources. • Evidence of effective and efficient wastewater management • Basic communication networks. • Basic pedestrian access, facilities. • Regional access to mass transit systems. • Some concessions to cycling.
1	<ul style="list-style-type: none"> • Evidence of attempts at water conservation and local supply sources. • Evidence of wastewater management. • Isolated evidence of communication networks. • Basic pedestrian access, facilities. • Regional access to mass transit systems.
